WORK EXPERIENCE

THE 20 MSP Group LLC (national IT Services organization) **Mar 2024 - May 2025**
Data Analyst & System Administrator *Boston, MA*

- Versatility: Seamlessly managed operations, multiple analyst workstreams and system-administration tasks during the Drivetech acquisition, using Python for data analysis and Kaseya for service ticket coordination
- Analysis: Increased overall operation efficiency 20% by evaluating and analyzing client performance, technician efficiency, and operational effectiveness through advanced data processing and Power BI reporting
- Business Analysis: Held regular check-ins with the Regional Director (former owner of Drivetech) to review client data, operational outcomes, and performance metrics, supporting strategic business decisions
- Client Management: Liaised with client company management while directing daily service operations, ensuring prompt resolution of client concerns and maintaining high service quality and client relationships
- Project Management: Coordinated short-term projects, assigning daily tasks to engineers based on their skill sets and schedules, and balanced multiple priorities, which resulted in on-time completion of all projects
- Operation Management: Led procurement, ensuring timely acquisition and delivery of equipment and resources

Drivetech Inc. **May 2023 - Mar 2024**
Business Analyst (employed by Drivetech Inc. prior to The 20 MSP Group LLC acquisition) *Boston, MA*

- Strategy: Worked directly with the owner to evaluate the feasibility of selling the company and subsequently played a critical role in the acquisition by THE 20 MSP in March 2024 through strategic contributions to business analysis, operational improvements and valuation
- Business Analytics: Compiled a comprehensive analysis of 3 years' worth of service and revenue data, identifying growth trends and drivers of company profitability, increased yearly profitability by 7%
- Data Collection/Exploration: Wrangled client data (over 300,000 records) from ConnectWise Manage, discovering and preparing data available for analysis
- Data Processing/Analysis: Processed and visualized data sets in Excel and Power BI, producing detailed profit-margin and client-performance reports that derived actionable insights and supported quarterly business reviews
- Business Consulting: Partnered with the owner to design new pricing models, improved pricing accuracy and boosted profitability of the company

PROJECTS

Business Analytics - CMU MSBA Capstone Project **Jan 2026 - Apr 2026**
Project Geminae *Pittsburgh, PA*

- Served as Business Analyst on Project Geminae capstone, evaluating gaps in an existing seismicity prediction pipeline, implementing nonlinear and causal modeling enhancements, defining performance metrics beyond R^2
- Structured dashboard connected to the pipeline to provide data visualization, translating complex analytical results into clear insights for technical and non-technical stakeholders
- Acted as primary client liaison, managing client correspondence, scheduling, and internal team communication to align stakeholder feedback, project milestones, and final deliverables
